

CK PRESETTER

Maximized efficiency with benefit of modular construction.

- Easy and precise presetting with the boring head only.
- Compact in size, ideal for limited space such as next to the machine.

● CKP150ZA (For CK1 to 6) **NEW**

Covers rough and finish boring heads including various length of cylindrical toolholder series.

With optional dial gauge to measure cutting edge height, presetting for balanced or step cut on RW Head is available.

Model	CKP150ZA
Measuring capacity	Radial : $\varnothing 0 - \varnothing 150$ (CK1 - CK6)
CK No.	CK1 - CK6
Min. scale	Radial : 0.02mm/ \varnothing Axial : 0.01mm
Max. tool height	Max. 227mm (for CK6)
Master gage	$\varnothing 50 \pm 0.005$
Read method	Direct reading of diameter
Weight	6.5kg

1. Tool length is not measurable.
2. Use within measuring precision of 0.02mm/dia.
3. Max. measurable diameter is 150mm.
